Exploration Licence 8639 was granted to J. W. Benger on the 15/6/94 for a period of 6 years. The licence contained 55 blocks covering an area of 177 square kilometres and was located in the Hay River 1:250,000 Sheet.

The area was considered to be prospective for gold, platinum and palladium. This view was based on work carried out by BMR in the early 1980's.

No work was carried out on the Licence area and the Licence was surrendered at the date of the first anniversary.
